## *FREE VESSEL SAFETY INSPECTION*

The United States Coast Guard Auxiliary will provide a free safety inspection to anyone who requests it. This voluntary program is intended to assist boat owners to assure that their watercraft is compliant with federal, state and local safety requirements. In addition, the examiner has an opportunity to discuss with fellow boaters any watercraft related questions they might have. This program is not intended to penalize boaters and no citations are given by the examiner, just friendly assistance at no charge.

For assistance call Mary Poe 540-3113

## *CBCA BOARD MEETING LOCATION CHANGE*

Larry Coffey has generously agreed to allow the monthly CBCA board meetings to be held at the Gas'N'Shop Office at 720 Marina Bay Place. We will use the South entrance to their club room for our meetings. The monthly meeting will continue to be held at 7:00 PM on the third Monday of each month.

## *AGENDA AVAILABLE*

In order to keep our members informed about issues that will be discussed at the next board meeting, the tentative agenda will be posted on the CBCA web site each month the week prior to the meeting. Members can review it, and if they want to provide the board with input, plan to attend the meeting or give a board member a call.

## WHAT CAN WE DO TO PROTECT WATER QUALITY?

Lawn fertilizers containing phosphorus are one of the primary nutrients that turn lakes green with algae. Fertilizers, leaves, grass clippings, eroded soil and animal waste are all sources of phosphorus. When they are swept or washed into the street or drain they end up in the lake. As you plan for yard fertilization, consider using a phosphorus-free fertilizer **every time you fertilize**. For more information see <http://www.moea.state.mn.us/campaign/download/phosphorus.pdf>. While phosphorus is necessary to grow healthy lawns, soils in many parts of Nebraska already have an adequate amount. In these instances, adding more phosphorus in fertilizer is not needed and will not benefit your lawn. Healthy lawns can be maintained with phosphorus-free fertilizers.
